

610 Trident - READY TO GO!

\$98,900!!! ONE ONLY, PRICED TO CLEAR

Description

Are you ready to take the next step and go further than you've ever been? This Trident will take you to the fish and back without trying!

Carrying an overall length of 6.34m this is a plate boat to please even the experienced operator. Fill your 160L fuel tank and set sail. Boasting a thick 5mm bottom sheet and 3mm side sheet, this is tough. Don't be fooled by his rigid build, it's comfortable for any condition. The Quintrex RD team smashed it with the blade series hull across the range, but on this, it's perfect.

Powered by the ever reliable Yamaha F150XC, you've got power in plenty and efficiency like no other. Smooth and quiet is how you will describe this engine to those who ask. The integrated Hydraulic Steering not only looks good, it feels good, making operation a dream.

To get you around the rock, this package is supported by a Telwater 2000 ATM Trailer, it's everything you need it to be!

This boat has been our display boat and never touched the water. It's clean skinned to be tailored to your every need, or if you want us to guide you we have this packaged to include the touches above standard to cover all waters.
