F175

Yamaha's popular and proven range of F175 Digital and Mechanical Control outboards now feature a newly designed look and integrated steering, taking these engines to the next level when it comes to power, reliability and control.

INTEGRATED HYDRAULIC STEERING

The Integrated Hydraulic Steering system is housed in a neat, sealed cylinder unit, which is bolted into the transom bracket of the engine, rather than being a third party bolt-on component. This results in a simple and clean rigging setup, and an unobstructed edge and transom area, while exposing less components to the elements for improved long-term durability and reliability.

2700cc 4-Stroke Engine

- In-line design delivers excellent fuel efficiency.
- All-new Integrated Hydraulic Steering.
- All-new cooling design.
- Built in 600 series.
- Choose Digital Electronic Control (DEC) or Mechanical Control (MC).
